MEMORANDUM FOR: Director of Security
FROM: Director of Central Intelligence
SUBJECT: Newsletter on Industrial Security

We talked some time ago about putting out periodic newsletters on industrial security. This issue came up recently in connection with an FBI wrapup of a foreign espionage case. The FBI was interested in ensuring that industry was aware that this particular country was involved in industrial espionage (it was not the Soviet Union). It is the kind of thing, it seems to me, we could put out in our newsletter. Where does the project stand?
